

Uniclass L513:P314	EPIC E239:X342
Cl/SfB (41)	Ro3

- **Chromatics RS** - Allows the designer to use for the first time a coloured safety glass (annealed glass laminate) that is thermally safe for external façade applications
- **Chromatics RS** – Uses annealed float glass – not toughened glass (traditionally used in exterior applications) and has not therefore been subjected to very high temperatures (600+ degrees) used in the normal toughening and ceramic coating processes
- **Chromatics RS** - A flawless flat finish with no 'roller wave' (toughening distortion) or pinhole burns – Resulting in a superior reflected image quality
- **Chromatics RS** - A lightweight glass façade material (6mm Chromatics weighs 15kg) – in a maximum panel size – 3000 x 1200 mm

**Chromatics RS – Exterior grade, lightweight, opaque, coloured safety glass cladding**

## Technical Data

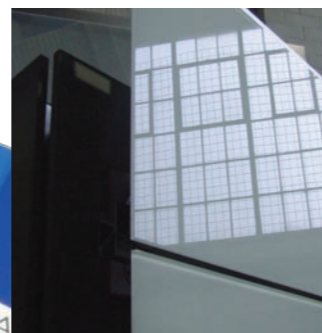

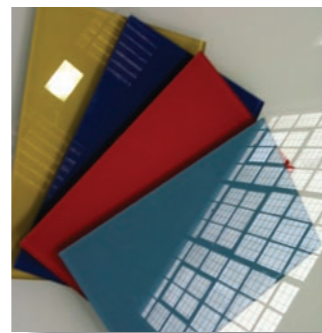

Thickness	6.5mm
Weight	15kg/m <sup>2</sup>
Maximum panel size	3000 x1200mm*
Wind resistance	Serviceability: > Pass at 2400Pa Safety: Pass at 3600Pa
Weather resistance	>BS EN 12453, >BS 3900
Thermal safety	To achitectural requirements
Impact resistance	BS EN 12600 (safety glass)
Adhesion	>BS EN 1542
Life expectancy	50 years
Fire rating	N/A – non-combustible
Light transmittance	Zero
Bonding approvals	Silicone, polyurethane, poltsulphide
Vapour barrier	Aluminium
